

Australasia's Largest Manufacturer of...

KING'S FIBREGLASS

Is a manufacturer of quality fibreglass products. Managing Directors, Glen & Cathy King have been associated with the fibreglass industry for over twenty-five years. King's Fibreglass pride themselves on offering quality products with a high standard of service, at realistic prices.

When it comes to slides, safety is our number one priority. King's Fibreglass slides are made to Australian & New Zealand Safety Standard guidelines. Over the years we have continued to redevelop our slides to a stage where we believe that they are among the safest on the market.

King's Fibreglass slides have developed deep child proof sides which helps prevent children from curling their fingers under the edges, therefore preventing injuries to their small hands.

Other features include colour coding front and back, and a block of wood mounted into the slide to make it easier for customers who do their own installations.
